EDUCATION

B.Tech, Computer Science & Engineering (AIML) [8.6 CGPA]

2022 - 2026

Maulana Abul Kalam Azad University of Technology (MAKAUT)

SKILLS

Product	Product Strategy, Roadmapping, Product Discovery, User Research, Prioritization (RICE Framework), PRD Writing, A/B Testing, Experiment Design, Competitive Analysis, Stakeholder Management, Go-to-Market Strategy
AI	AI Product Strategy, AI/ML Fundamentals, Human-AI Interaction Design, Responsible AI, Trust Considerations
Technical	React, Node.js, Python, SQL, REST APIs, Git
Soft Skills	Adaptability, Agile Methodologies, Leadership, Cross-Functional Collaboration

PROJECTS & CASE STUDIES

FeedbackLens

<https://feedbacklens-theta.vercel.app/>

- Identified a gap in customer-feedback workflows and defined FeedbackLens, an AI-powered product intelligence workspace connecting feedback analysis, opportunity prioritization, decision tracking, and release validation.
- Built the working AI product prototype, implementing automated sentiment/topic analysis, transparent opportunity scoring, evidence-linked decision records, PII protection, and post-release validation.

Replit Pricing Predictability

<https://apm-portfolio-psi.vercel.app/work/replit-pricing-diagnostic>

- Diagnosed Replit Agent's pricing predictability failure through cohort analysis and competitive benchmarking, identifying cost visibility and billing-on-failure as key retention risks.
- Prioritized a trust-repair roadmap using ICE scoring, defining experiments, success metrics, and phased fixes across spending limits, cost visibility, and billing safeguards.

Notion: Reimagining the AI OS

<https://apm-portfolio-psi.vercel.app/work/notion-ai-foresight>

- Identified strategic whitespace in Notion AI through competitive and JTBD analysis, defining a product strategy for "Notion Foresight" to surface delivery risks from existing workspace content.
- Prioritized the MVP using RICE and translated product strategy into a PRD, experimentation plan, success metrics, and phased rollout focused on trust and adoption.

EXPERIENCE

Software Development Engineering Intern

May - June 2026

BlackCoffer

- Improved enterprise onboarding workflows by integrating sequential backend APIs, reducing execution failures by 35% and enhancing user experience.
- Drove application stability and release efficiency through Gradle, Metro Bundler, and Android runtime optimization, reducing build time by 40% and enabling faster product releases.

Full Stack Developer Intern

August - November 2025

Jabsz Gaming Studio

- Developed a multi-game web application (12+ games) optimizing user experience, state management, and modular architecture to achieve 40% faster load times.
- Designed and implemented a 3-tier difficulty and scoring system based on user engagement patterns, increasing average session duration by 30% and improving gameplay retention.
- Led feature strategy for an AI-powered smart farming platform integrating weather, soil, crop recommendations, LLM chatbot, and 6-month price forecasting, improving decision efficiency by 35%.

CERTIFICATIONS

- Claude with Google Cloud's Vertex AI, Anthropic
- AI Fluency: Framework & Foundations, Anthropic
- Gemini Certified Educator, Google
